

Farm-to-Plate AI: Enhance Freshness and Reduce Waste with Robotics and Computer Vision

Hardware and Software Requirements

To participate in the workshop, you need:

1. A laptop
2. Google Chrome browser
3. A MathWorks account

You will be provided with a temporary workshop license that will give you access to all products used in the workshop, as well as the workshop exercise files.

Please download a copy of this document to be able to click on the links provided.

Need Help?

If you run into any issues completing the steps below, please join the following Microsoft Teams meeting and our TAs will help you troubleshoot:

[Join the meeting now](#) or type URL: <https://tinyurl.com/RemoteTAs>

The team of remote TAs will also be available to provide assistance throughout the workshop exercises.

Step I. Set Up Your MathWorks Account

If you don't have a MathWorks account, you need to create one to get access to MATLAB Online and the material for this event. You will need access to your email on the machine you are using to create the account.

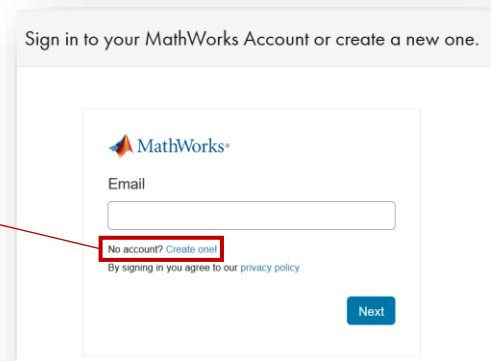

1. In Google Chrome, go to:
<https://www.mathworks.com/mwaccount/> and click **Create one!** next to No Account?:

No account? Create one!

2. Fill out the form and click **Create**. Follow the directions for verifying your email address.
3. To complete your registration, click the link in the verification email and fill out the form.

You must check the Online Services Agreement box.

You may leave these fields blank: Activation Key or License Number, Sales rep contact, Associate with a license, Trial

-> Next page for Steps II, III, and IV

Step II. Activate the Workshop License

The workshop uses MATLAB Online. You must activate the workshop license to participate. You can activate this license starting from the day of the workshop up to a week after the workshop date.

1. Navigate to this address in Google Chrome:
<https://www.mathworks.com/licensecenter/classroom/4670603/>

If you are not already logged in, do so.

2. Click **Access MATLAB Online**.

The screenshot shows the MathWorks website interface for license activation. The header includes the MathWorks logo and navigation links: Products, Solutions, Learn, and Company. The main heading is "MATLAB & Simulink". Below this, a section titled "Access MATLAB for your Deep Learning Workshop" contains a paragraph explaining the special license for course participants. A table lists the following details:

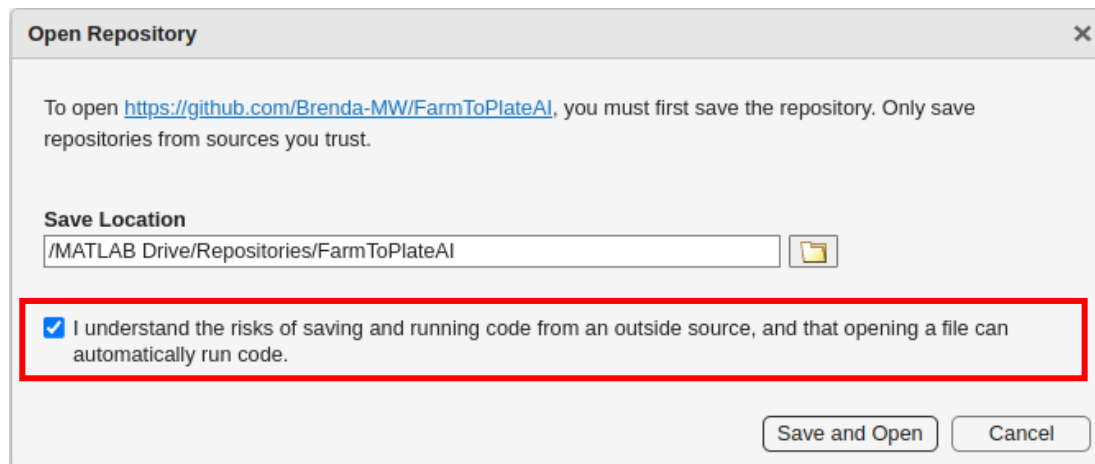

| | |
|---------------|--|
| Course Name: | Hands-On AI for Everyone at NeurIPS 2024 |
| Organization: | MathWorks Deep Learning |
| Starting: | 11 Dec 2024 |
| Ending: | 12 Dec 2024 |

At the bottom of the section is a blue button labeled "Access MATLAB Online".

Step III. Access Exercise Files

MATLAB Online will try to port your workshop files from GitHub automatically. You will see a dialog pop-up for saving and opening the repository of files.

1. Click on the checkbox to accept outside source code.
2. To access the files, hit "Save and Open".

The screenshot shows a dialog box titled "Open Repository" with a close button (X) in the top right corner. The main text reads: "To open <https://github.com/Brenda-MW/FarmToPlateAI>, you must first save the repository. Only save repositories from sources you trust." Below this, there is a section labeled "Save Location" with a text input field containing "/MATLAB Drive/Repositories/FarmToPlateAI" and a folder icon button. At the bottom, there is a checkbox that is checked, with the text: "I understand the risks of saving and running code from an outside source, and that opening a file can automatically run code." This checkbox area is highlighted with a red border. At the bottom right, there are two buttons: "Save and Open" and "Cancel".

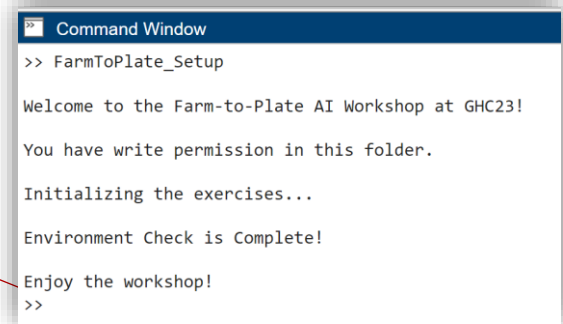

Step IV. Verify Your Environment

To verify that your environment is correctly set up for the exercises:

1. Run the command below in the MATLAB Online Command Window:

>> FarmToPlate_Setup

2. Confirm that the **welcome message** is displayed.

```
Command Window
>> FarmToPlate_Setup

Welcome to the Farm-to-Plate AI Workshop at GHC23!
You have write permission in this folder.

Initializing the exercises...

Environment Check is Complete!

Enjoy the workshop!
>>
```

Congratulations! You are all set!
